

# Capella Observatory CCD Double Star Measurements – Report 1

Alessandro Bertoglio

Capella Observatory  
Gruppo Astrofili William Herschel

Corso Trapani 80  
10139 Turin, Italy

alessandro.bertoglio@fastwebnet.it

**Abstract:** This report submits CCD measurements of 394 pairs, including several neglected, observed in the period 2006 – 2007 using 30 cm. Dall-Kirkham telescope. Some possible new components are suggested.

In 2006 I started to measure double stars and I report here the measurements of 394 pairs.

For the measurements, I used a Takahashi Mewlon 300 (300/3572) mounted on a 10 Micron GM 2000 equatorial mount, see Figure 1. The CCD camera is a SBIG ST7XME. The method is the same that I reported in a previous paper [Bertoglio, 2007], where I used an equivalent focal length of about 12500 mm with a Barlow lens and, for data reduction, *Reduc* by Florent Losse.

The pairs were from the neglected list of the WDS catalog or from the observing programs of the Spirit of 33 group, as I'm a visual observer too.

The following rho, theta (and their sigmas) and magnitude differences in the table result from average of 8682 single measurements. Some discussions and notes about the pairs, including possible new components, are presented in the notes list of the results table.

You can see more than one hundred images of these measured double stars in the web gallery at the url <http://www.microthele.it/astro/misurazioni/reportok/index.htm>.

## Future Plans

In order to increase my ability to measure close

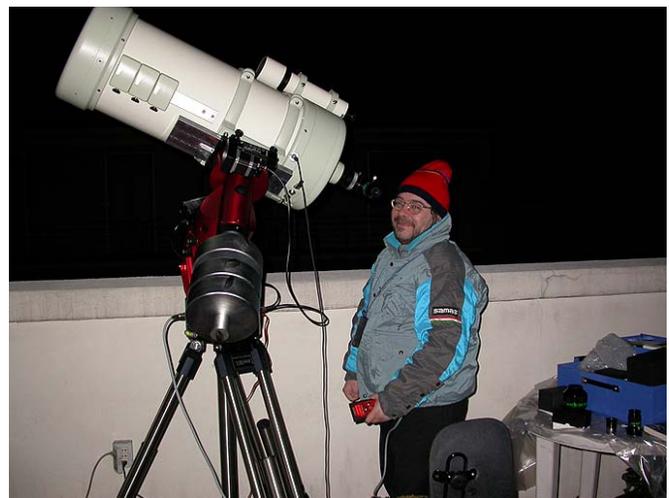

Figure 1: Mewlon (the big) and me (the short).

pairs, I bought a Lumenera Skynix 2-1 camera for the “lucky image” method and now the optical train (Barlow lens, flip mirror and camera connection) has a 2 inch adjustment.

## Acknowledgements

I wish to again thank Florent Losse for his formidable *Reduc* program and encouragements from Tais

### Capella Observatory CCD Double Star Measurements – Report 1

Ferraz; without her help the data reductions and this servatory.

article would not have been possible. I also thank my I dedicate this article to Annie Persico, the brighter friend Luca Sabatini and the members of the mail list star of my life.

“Stelledoppie”

(<http://it.groups.yahoo.com/group/stelledoppie/>)

for their enthusiasm.

This research has made use of the Washington Double Star Catalog maintained at the U.S. Naval Ob-

#### Table Notes

1. GYL 76, Measurements differ from WDS, but confirmed by 2MASS images
2. POU 129, Stack of 20 images. Measurement pretty different from WDS
3. J 2716, Stack of 23 images
4. POU 144, Stack of 11 images. Measurement very different from WDS
5. STF 1741 Ari, Average of 2 stack of 12 images
6. STF 180 AB, Gamma Ari
7. STF 205 A-BC, Gamma And - Stack of 10 images
8. CHE 58, Stack of 38 images
9. CHE 59 AB, Stack of 40 images. In my pictures there are 2 probable new components AC (BTG 7) and AD (BTG 8), see notes 10 and 11 and Figure 2. In the 2MASS field, it is possible to see another 2 probable components, one of these are faint and close to the primary.
10. BTG 7 AC, Stack of 40 images. Probable new component AC (BTG 7), see Figures 2 and 3.
11. BTG 8 AD, Stack of 40 images. Probable new component AD (BTG 8), see Figures 2 and 3.
12. CHE 64, Stack of 31 images
13. STF 237 AC, Stack of 20 images
14. STF 237 AB, Stack of 20 images
15. STF 287, Stack of 22 images
16. STF 28933, Ari - Pretty different in PA
17. STF 296 AB, Theta Per
18. STF 296 BC, Theta Per
19. COU 870 AC, Stack of 24 images
20. ES 2597, My magnitude measurements of the primary show very probable light variation of the primary (really it is NSV15664).
21. STF 376, Pretty different in separation
22. STF 391, Some differences in PA and separation from WDS
23. STF 412 AB-C, 7 Tau
24. HJ 341, In the field I can see another easy star but rather distant
25. ES 567 AB, A three stars group
26. ES 567 BC, There is an error on WDS: the measurements in the catalog refer to the BC components, but these are actually the AC measurements.
27. STF 654 AB, Rho Ori - Some differences in measurements from WDS
28. SEI 208, Stack of 23 images
29. SEI 229, = FOX 140 (same data on the WDS)
30. STF 716 AB, 118 Tau
31. STF 748 Aa,B, Theta 1 Ori (Trapezium)
32. STF 748 Aa,C, Theta 1 Ori (Trapezium)
33. STF 748 Aa,D, Theta 1 Ori (Trapezium)
34. STF 748 Aa,E, Theta 1 Ori (Trapezium). Stack of 23 images. Average of different algorithms available using *Reduc*.
35. STF 748 Aa,H, Theta 1 Ori (Trapezium). Stack of 200 images. Very difficult!
36. STF 748 Ca,F, Theta 1 Ori (Trapezium). Stack of 23 images. Using *Reduc* Surface algorithm.
37. J 591 AB, This is a second measurement (after 1 year) and the magnitude difference is slightly changed. For this reason I can not confirm the suspected variation of one component of this pair as I suggest in my previous article: Bertoglio, 2007.
38. BTG 1 AC, Second measurement after one year from the discovery of this component. The magnitude difference increased about 0.4. Maybe this is an indication of some variability as suspected in my previous article: Bertoglio, 2007 .

### Capella Observatory CCD Double Star Measurements – Report 1

39. J 1822, Consistent measurements changes from WDS
40. STF 900 AB, Epsilon Mon
41. STF 914, Stack of 33 images
42. J 1092 AB, AB position changed. A third possible component (BTG 10 AC) is in the field about 35" away (see note 43).
43. BTG 10 AC, Stack of 28 images. A faint possible component (BTG 10 AC) in the field, see Figures 4 and 5.
44. STF 919 AB, Beta Mon
45. STF 919 AC, Beta Mon
46. STT 141, Large measurement differences from WDS.
47. J 2428, Measurements changed from WDS.
48. STF 953, Slight measurements differences from WDS.
49. ES 2097, There are strong measurements differences from WDS but I'm pretty sure this pair is ES 2097 (no other pairs in surrounding fields).
50. A 58 AB, Consistent difference in PA from WDS.
51. STF 982 AB, 38 Gem
52. STF 991 AB, Stack of 28 images
53. STF1014, Inversion error using *Reduc* but also WDS reports B component brighter than A.
54. COU 275 AB, New possible component at 44" (BTG 11 AC), see note 55.
55. BTG 11 AC, Possible new component of COU 275, see Figures 6 and 7.
56. STF1066, Delta Gem - Stack of 21 images
57. HJ 53, Stack of 39 images
58. STF1083, It seems that the last separation measurement in WDS is not very accurate. I made several measurements and the differences from WDS were always the same.
59. STF1089 AB, Some differences from WDS.
60. SHJ 368 Aa-B, 63 Gem
61. ES 2625 AB, Some differences from WDS.
62. STF1116, Stack of 17 images
63. STF1110 AB, Alpha Gem
64. STF1170, Stack of 17 images
65. POU2921, Surely there is an error in the last WDS data as my measurements are very similar with the first (1893) WDS report.
66. PKO 8, My measurements are so different that I think that this pair is not PKO 8
67. STF1179 AB, In my image there is a very faint and not measurable star near the B component. It is BU 582 BC.
68. STF1181, Some differences from WDS.
69. STF1177, Strong differences from WDS.
70. STF1186, Stack of 15 images
71. STF1212, Some differences from WDS.
72. SEI 495, There are large measurements differences from WDS, but I'm pretty sure this pair is SEI 495 (no other pairs surrounding fields).
73. STF1224 A-BC, 24 Cnc
74. STF1223, Phi2 Cnc
75. STF1228, A very quiet pair: no important changes in about 200 years.
76. MLB 839, I was looking for MLB 838 but I did not find it. Near the MLB 838 position I found this pair. I think this pair may be MLB 839.
77. ALI 353, There are some measurements differences from WDS, but I'm pretty sure this pair is ALI 353 (no other pairs in surrounding fields).
78. STF1268, Iota Cnc
79. HJ 458, PA unchanged, separation increased.
80. STF1283, Stack of 4 images
81. STF1291 AB, 57 Cnc
82. STF1298 AB, 66 Cnc
83. AG 162, Some differences from WDS.
84. HO 644 AC, Stack of 50 images
85. STF1353, Inversion error using *Reduc*.
86. STF1360 AB, Inversion error using *Reduc*.
87. STF1364 AB, Some separation difference from WDS.
88. HJ 466 AC, Remarkable separation difference from WDS.
89. H 5 58, 7 Leo
90. STT 204 AB, Large PA difference from WDS
91. STF1396 AB, C component not observable.
92. STF1413, Stack of 5 images. Large separation difference from WDS.
93. STF1417, Frequent inversion error using *Reduc*.
94. STF1424 AB, Gamma Leo
95. SEI 520, The differences in measurements are so large that this star may not be SEI 520.
96. STF1502, Great differences from WDS
97. STF1503, Stack of 18 images
98. STF1596, 2 Com

### Capella Observatory CCD Double Star Measurements – Report 1

99. STF1606, Only one good image on 350. Measured using Quad Pix and Surface algorithms by *Reduc*.
100. STF1622, 2 CVn
101. SHJ 143 AC, 12 Com
102. J 1023, Stack of 22 images. PA measurement pretty different from WDS.
103. STF1657, 24 Com
104. STF1692, Alpha CVn
105. STF1755, Stack of 30 images. Poor measurements cause bad seeing.
106. STF1772 AB, 1 Boo
107. STF1821, Kappa Boo
108. STFA 26 AB, Iota Boo
109. STF1864 AB, Pi Boo
110. STF1877 AB, Epsilon Boo
111. STF1890, 39 Boo
112. STF1965, Zeta CrB
113. STF2032 AB, Sigma CrB
114. STFA 30 AC, 17 Dra
115. STF2078 AB, 17 Dra
116. STF2264, 95 Her
117. STF2280 Aa-B, 100 Her
118. STF2367 AB-C, There is a possible faint component (BTG 2 AB-F). See note 120.
119. STF2367 AB-D, Stack of 43 images
120. BTG 2 AB-F, Stack of 43 images. Possible faint new component (see Figures 8 and 9).
121. STFA 39 AB, Beta Lyr
122. J 2935, Stack of 24 images
123. J 767 AB, Stack of 43 images. Large difference with 1999 measurements on WDS.
124. J 767 AC, Stack of 43 images
125. J 2989, Stack of 30 images. Larger than WDS measurement.
126. SMA 93, Stack of 35 images
127. J 3007 AB, Stack of 30 images. There is a faint and closer component BTG 3 AC (see note 128).
128. BTG 3 AC, Stack of 30 images. An interesting new component (see Figures 10 and 11)
129. BRT2251, Stack of 25 images.
130. J 2308 AB, Stack of 50 images.
131. J 2308 BC, Stack of 50 images. I also measured the AC component not reported in WDS (see note 132). Two possible new components (BTG 4 AD and BTG 5 AE) are in the field (see notes 133 and 134).
132. J 2308 AC, Stack of 50 images. Pair not measured in WDS.
133. BTG 4 AD, Stack of 50 images. Possible new component (see Figures 12 and 13).
134. BTG 5 AE, Stack of 50 images. Possible new component (see Figures 12 and 13).
135. STF2726, 52 Cyg
136. SEI1375 AB, Stack of 34 images. There is a new component AD (see note 138)
137. SEI1376 AC, Stack of 34 images.
138. BTG 6 AD, Stack of 34 images. New component AD (Figures 14 and 15).
139. STFB 11 AB, 1 Peg
140. STFA 56 AB, 3 Peg
141. J 1232, Stack of 27 images
142. ES 2066, I was looking for SEI 1532 but I did not find it. Near the SEI 1532 position I found this pair.
143. J 3153, Stack of 22 images. Large measurement differences with WDS.
144. J 3155 AB, Stack of 26 images. Some measurement differences with WDS. A possible new component D ( BTG 9 AD) is in the field (see note 145). In my image there is also the C component, but it is too faint to measure.
145. BTG 9 AD, Stack of 26 images. New possible component (see Figures 16 and 17).
146. BRT2502, Large separation difference from WDS.
147. SMA 161, Stack of 16 images
148. J 1224 AB, Stack of 28 images. BC pair is not splittable, but only elongated.
149. GYL 73, Stack of 20 images. Large measurement differences with WDS.
150. STF2889, Stack of 14 images
151. SMA 164, Large measurement differences with WDS.
152. DOB 16, The magnitude difference that I measured is different from WDS. In the field I can see a more distant component, I think this may be the recently discovered H 13 AC.
153. CHE 401, Stack of 25 images. Great separation difference from 1906.
154. POU5755, Stack of 29 images.
155. STF2990 AB, Inversion error using *Reduc*.
156. ZUL 2 AC, Stack of 18 images.
157. HJ 1874, Stack of 18 images. Measurement differences from WDS.
158. J 3196, Stack of 33 images

Capella Observatory CCD Double Star Measurements – Report 1

- 159. STF3040, Large PA measurement difference from WDS.
- 160. J 863, Average of 2. stack of 21 images. Some measurement differences from WDS.

- 161. HJ 993, Stack of 19 images. Measurement differences from WDS.
- 162. HJ 996, Stack of 25 images. Measurement differences from WDS.
